

Team Contribution Summary

Deliverables 1 and 2 - evidence-based summary from the repository history and team work plan

Team member	Primary contributions
Moiad Akari	Repository and project structure; shared header/footer and About page; student dashboard and profile frontend; Node/Express package setup; SQLite schema, database connection, initialization foundation, and repository integration.
Samy Adjerid	Home page and public event browsing interface; event list and details presentation; search/filter frontend; initial database-backed student event and registration route work used during final integration.
Omar Obeid	Password recovery frontend; admin event creation/edit/manage frontend; database-backed authentication, bcrypt hashing, sessions, role guards, profile API, security-question recovery, cross-page session integration, final student API integration, automated tests, compatibility review, and submission audit.
Erik Dahan	Login/admin frontend work; admin dashboard with registrations, capacity and attendance UI; My Registrations frontend; event/admin backend models, CRUD, status changes, attendance, statistics, seed data, and Deliverable 1 documentation.

Shared responsibilities

- Coordinate page and API contracts across student, admin, authentication, and database areas.
- Review the integrated product, installation instructions, and demonstration flow before submission.
- Explain individual contributions honestly and understand the basic end-to-end system flow.

Team confirmation

The team should verify this summary against the course contribution form and add any student IDs, signatures, percentages, or instructor-specific fields required by Moodle before submission.
